TECHNICAL SKILLS

Languages
C · Python · Java · JavaScript · SQL · PHP

Systems & Tools
POSIX · Linux · macOS · Bash · Zsh · Git · Make

Libraries & Data
OpenCV · FaceNet · scikit-learn · MiniLibX · Oracle APEX

Engineering
Algorithms · Debugging · Testing · Shell automation

EDUCATION

STAMFORD INTERNATIONAL UNIVERSITY
Undergraduate · Information Technology
Bangkok, Thailand

42 BANGKOK
Project-based curriculum
Unix · C · Algorithms · Peer evaluation

MORE PROJECTS

pipex
Unix pipelines, PATH resolution, heredoc support

push_swap
Stack-based sorting and operation optimization

LANGUAGES

Burmese · English (IELTS 6.5)

PROFILE

Software engineering student at Stamford International University and 42 Bangkok, building practical software across Unix systems, developer automation, computer vision, and graphics. Interested in reliable implementation, debugging, and software engineering internships.

SELECTED PROJECT EXPERIENCE

Flow CLI

INDEPENDENT

C · Bash · Zsh · macOS · Linux

- Built a C-based command-line tool to record, save, organize, and replay developer workflows for repeatable testing and project setup.
- Integrated Bash/Zsh shell hooks, workflow management, and error handling across macOS and Linux environments.

Minishell

42 BANGKOK

C · POSIX · Readline · Make

- Collaborated on a Unix-like shell with tokenization, variable expansion, redirections, heredocs, and built-in commands.
- Managed processes and pipelines through fork(), execve(), waitpid(), pipe(), and dup2(), including signal and resource handling.

Face Attendance

STAMFORD

Python · OpenCV · FaceNet · KNN

- Developed a recognition pipeline using multi-angle face datasets, preprocessing, FaceNet embeddings, and KNN classification.
- Handled native Python dependencies, macOS camera permissions, Apple Silicon compatibility, and PyInstaller packaging.

so_long

42 BANGKOK

C · MiniLibX · Pixel Rendering

- Built an animated 2D game with enemy behavior, collectibles, collision handling, and flood-fill map validation.
- Composited layered sprites with pixel-buffer operations and transparency handling to draw characters and objects over terrain.
